

MOHAMAD FAIZ IRFAN BIN MOHAMAD ZAID

+601156329034 | faizirfan2608@gmail.com | Software Developer | [Portfolio](#)

PROFILE

Software Developer with professional experience building scalable web and mobile applications using Angular, Ionic, TypeScript, and NestJS. Experienced in UI/UX implementation, API integration, admin portal development, AI automation and production application maintenance across healthcare, logistics, and smart-retail domains. Additional experience in full-stack web development and machine learning through industry internship and academic research.

TECHNICAL SKILLS

Languages	: JavaScript, TypeScript, Python, HTML5, CSS3, SQL, PHP
Frameworks & Libraries	: Angular, Ionic, NestJS, Next.js, Laravel, RxJS
Machine Learning	: TensorFlow, CNN, ResNet50, Computer Vision
Database	: MySQL, Firebase, PostgreSQL
Tools	: Git, Android Studio, VS Code, Stitch, Figma
AI & Automation	: OpenClaw, AI-assisted workflow automation

PROFESSIONAL EXPERIENCE

BUGZSTUDIO SDN BHD – Bukit Tinggi, Klang

Software Developer | October 2025 – July 2026

- Led frontend architecture and development of scalable web and mobile applications using Angular, Ionic, and NestJS.
- Diagnosed and resolved performance bottlenecks while optimizing frontend data flow and API integrations for production applications.
- **Rest N Go (RNG) Mobile App & Admin Portal:**
 - Redesigned and implemented core mobile features, integrating hardware-level QR scanners and dynamic digital membership passes.
 - Enhanced wallet management by modifying data-mapping functions to accurately calculate and display internal app credits.
 - Engineered an Angular-based admin portal for centralized promotion and news management.
- **Ekajaya Cement Distribution Platform:**
 - Developed core frontend modules and backend API supporting large-scale order processing and customer management workflows.
 - Implemented complex data tables and dynamic document generation using Stimulsoft for specialized reporting and printing.
- **UMSC Q-Care & Doctor Portal:**
 - Developed patient-facing modules and doctor dashboards while integrating frontend interfaces with healthcare backends.
- **AI-Assisted Development & Testing:**
 - Built an AI-assisted development and testing workflow using OpenClaw and Telegram to monitor coding progress, automate website testing, identify potential bugs, and communicate test results and status updates through a conversational interface.

STEALTHX PERFORMANCE SDN BHD – Petaling Jaya

Web Developer Intern | March 2025 – August 2025

- Designed and developed a full-stack car workshop and dyno booking platform with an integrated admin management dashboard.
- Built online booking workflows, service catalogue management, dyno session scheduling, and appointment management using Next.js, Laravel, TypeScript, and MySQL.
- Replaced manual phone-based bookings with a structured online booking system, reducing booking errors by 80%.
- Automated appointment tracking and administrative workflows, reducing staff workload by 90%.

SELECTED PROJECT

Final Year Project — Machine Learning Research | UMPSA

- Developed a deep learning system to classify heavy vehicles into small, medium, and large categories using side-view images.
- Implemented CNN architecture with ResNet50 as the backbone for vehicle-size classification.
- Trained and evaluated the model using Python and TensorFlow with real-world vehicle images captured from roadside angles.
- Applied machine learning and computer vision techniques for potential traffic monitoring and road-safety applications.

EDUCATION

UNIVERSITY MALAYSIA PAHANG AL-SULTAN ABDULLAH (UMPSA)

| 2021 – 2025

Bachelor of Computer Science (Software Engineering) with Honours
